WOWMAX PRESALE SMART CONTRACT AUDIT REPORT

07.06.2022

Contents

- Summary / 3
- Scope / 3
- Weaknesses / 4
  - Redundant reentrancy checks / 4

Summary

WOWMax's presale smart contract has low risk severity. During the audit our specialists found one low risk weakness.

Severity	Number of Findings
Critical	0
High	0
Medium	0
Low	1
Informational	0

Total: 1

Scope

The analyzed smart contract is located at:
https://github.com/wowswap-io/wut-token/blob/main/contracts/WUTPublicPresale.sol
(commit 9d718e1d653444d09b2681c52b117afd85121b12)

Weaknesses

This section contains the list of discovered weaknesses.

1. Redundant reentrancy checks

Severity: Low

Remediation: remove the nonReentrant modifier

Description:

Given that the tokens are only **ERC20** compliant, the reentrancy checks are redundant as there is no way to change the execution flow.

```
function deposit(uint256 amount) external nonReentrant {
...
  }

  function withdraw(uint256 amount) external nonReentrant {
    require(block.number < secondStageStartBlock, "Unable to withdraw funds after second stage start");
...
  }

  function claim() external nonReentrant {
    require(allowClaimWUT, "Unable to claim WUT before presale ends");
...
  }

  function drawOut() external nonReentrant {
...
  }
```
